

Hosting and administration

Complete Solution for Optimal IT Performance

The immense reliance on IT in modern organisations demands professional and 100 per cent reliable **administration**. Solvisoft has many years of experience with large, complex business systems, but also with IT environments at small and *medium*-sized businesses. In both cases, we deliver a total solution that not only guarantees that your systems are always operational, but also that your investments in IT deliver their optimum return; from maintenance and administration to complete external hosting.

SOLVISOFT

Complete Solution for Optimal IT Performance

Dedicated Team of Professionals

For an optimally functioning IT environment, you don't need your own costly administration service in-house. It's true that, as an external IT specialist, Solvisoft is not physically present at your organisation, but is no less dedicated. With advanced monitoring technology, we ensure the operation of your systems 24 hours per day. If necessary, we of course can be at your location quickly, and we also pay regular visits to perform maintenance.

Customised Administration

With Solvisoft, you have the benefit of a team of IT specialists with years of experience and a reputation of professionalism and expertise. We manage your business systems according to the highest professional standards, for a set price per workplace. Solvisoft has a customised package of management and hosting services for every organisation. In clear and unambiguous service level agreements, we give ironclad guarantees on all aspects of our services.

Optimisation

Responsible investing

You can expect more from Solvisoft than just keeping your systems running. As a specialist in the ICT field, our know-how and expertise ensures optimal efficiency of IT services in your organisation. Solvisoft ensures that the set-up and performance of your PCs, servers, databases and applications are precisely tuned to each other and to the work processes in the organisation. We advise you in regard to responsible investment in IT so that you can be sure that you have the right equipment and software in-house, both now and in the long-term.

Monitoring

Avoiding breakdowns

How many people in your organisation can do their work if, for example, a server goes down? And how much turnover do you miss if online order entry doesn't function? Solvisoft checks your systems remotely, 24 hours a day, seven days a week. This ensures that you can not only rely on a fast response in the event of a system breakdown, but also helps avoid down time.

With our advanced monitoring software, we can most often detect approaching catastrophes at a very early stage and take preventive action in a timely way. That can often be done remotely so that a problem is resolved before you are even aware of anything unusual.

External Hosting

Business-critical systems in expert hands

Solvisoft also offers the option to secure your servers, databases or business applications in a secure data centre. You then have no worry in regard to security, administration and maintenance of your business-critical systems. Indeed, you have 24-hour access via a lightning-fast connection.

"You can expect more from Solvisoft than just keeping your systems running."

IT Administration According to the Highest Professional Standards

- 24 hour a day monitoring ensures undisturbed operation of your systems
- Optimisation of IT infrastructure
- Option for external hosting
